

## Chapter Technical Talks

### Concrete Cracking

This presentation will cover various aspects related to concrete cracking. This topic is both a contentious and unfortunately, a common issue nationally. Often, the key to addressing cracking issues is learning how to properly determine the cause of the crack so it can be mitigated and prevented in future projects. Topics covered in this presentation will include:

- Causes and control of cracking
- Evaluation methods
- Mitigation
- Crack repair

**Date:** Wednesday, June 15, 2016

**Time:** 11:30 am

**Venue:** The Barn Door,  
8400 N New Braunfels Ave,  
San Antonio, TX 78209

**Matthew Senecal, PE** is a Senior Engineer at the American Concrete Institute. His role at ACI is to provide technical and administrative support to ACI's Technical Committees and communicate the work of these committees to other Standard Developing Organizations and Regulatory Agencies. He received his BS in civil engineering from the University of Notre Dame and his MS in civil engineering from the University of Kansas. He worked as a Civil and Structural Engineer for 14 years before joining the ACI Engineering Department in 2004.
